LABORATORY WORK SHEET

Name of the Student : Abdul Basith Khan

Class 1st Year (CSM-A) Semester I st

Course Code : AHSD04 Course Name : PC Laboratory

Name of the Course Faculty : Dr Jetty Wilson Faculty ID : IARE10510

Exercise Number : 09 Week Number : 09 Date : 28/12/2023

Roll Number
2 3 9 5 1 A 6 6 0 1

DAY TO DAY EVALUATION:

Marks	Aim / Preparation	Algorithm / Procedure	Source Code	Program Execution	Viva - Voce	Total
		Performance in the Lab	Calculations and Graphs	Results and Error Analysis		
Max. Marks	4	4	4	4	4	20
Obtained	4	4	4	4	4	20

Common Errors in Pronounciation :-

Generally while speaking english we do common mistakes in pronounciation which include misplacing stress in words, neglecting vowels sounds and struggling with certain constant sounds, Additionally incorrect intonation, mumbling and poor rhythm can impact overall pronounciation. Practicing with the native speaker and language resources and tongue twisters can help refine three aspects.

Pronounciation errors in English often occurs various reasons, including different in Phonetics, regional accents, language back grounds and etc, Here are some common pronounciation errors with examples :

1/4

1. **Vowel Sounds:-** English has many vowel sounds that might not exist in other languages, leading to mispronounciation Example:- Pronouncing "ship" as "sheep" or "seat" as "sit".

2. **Consonant Sounds:-** Mispronounciations of constant sounds are common, especially those are not present in speaker's native language.

Example:- Pronouncing "th" as "d" in words like "the" or "this" (saying "dis" instead of "this").

3. **Word Stress:-** English words often have specific syllables stressed, and incorrect stress can affect clarity.
Example:- Saying "Con-duct" instead of "con-DUCT" or "pre-SENT" instead of "PRE-sent".

4. **Silent Letters:-** English words often contain silent letters that can confuse pronounciation.
Example:- Confusing "their" pronounciation of the word like "K" in "Knee" or "b" in "doubt", "b" in debt.

5. **Homophones:-** Words the sounds alike but have different meaning and spelling that can lead to confusing in pronounciation.
Example:- Confusing "their", "there", and "they're" in speech.

6. **Accent Influence:-** Different accents and dialects in english can lead to variations in pronounciation.
Example:- The pronounciation of "water" might differ between Britin English ("waw-ter") and American English ("wah-ter")

7. **Word Endings:-** Mispronouncing word endings, especially with plurals and verb conjugations.

Examples:- Saying "walked" as "walked" instead of "wawkd" due to misinterpreting the past tense marker "-ed"

Tongue twister are an excellent tool for improving pronounciation as they help in developing clarity, articulation and speed in speech.

ICS LAB:-

Topic: Global Warming

Good Afternoon everyone, I am Abdul Basith Khan from CSE (AIML) Department. Today I'am going to present a speech on global warming. Global warming is caused by the increase of carbon dionide levels in the Earth's surface and is a result of human activities that have been causing harm to our environment for the past few centuries. Global warming is something that can't be ignored and steps have to be taken to tackle the situation globally. The average temperature is constantly rising by $1.5°C$ for the last few days or years. The best method to prevent future damage to the Earth, cutting down more forests should be banned and afforestation should be encouraged. Start by planting trees near your homes and offices, participate in events, and teach the importance of planting trees. It is impossible to undo the damage but it is possible to stop further harm.
